SUMMARY

Cloud engineer with nearly 3 years of IT experience across cloud engineering, software development, and technical support. Built AWS infrastructure with Terraform, led an on-premises to AWS migration, and automated delivery with GitHub and FlexDeploy CI/CD. Delivered enterprise generative AI tooling on AWS and Google Cloud. AWS Certified Cloud and AI Practitioner.

SKILLS

Platforms: Amazon Web Services (AWS), Google Cloud Platform (GCP), Azure, Entra ID / Active Directory, Microsoft 365, Port.io

IaC, CI/CD & Automation: Terraform, PowerShell, GitHub, GitHub Actions, Git, FlexDeploy Workflows & Pipelines

Generative AI: GitHub Copilot, Claude Code, Cursor, AWS Bedrock Agents, Google Vertex AI, MCP, RAG

Systems & Security: Linux, monitoring (Dynatrace, SolarWinds), Amazon Cognito, cybersecurity fundamentals

Languages & Tools: Python, TypeScript/JavaScript, Java, C# (Foundational), SQL, FastAPI, React, MongoDB, Docker, Power BI

EXPERIENCE

Schreiber Foods | Green Bay, WI

Jan 2025 - Present

Junior Cloud Engineer

Jun 2026 - Present

- Led migration of on-premises services to AWS using ECS, Lambda, API Gateway, CloudFront, Route 53, and Cognito, supporting an on-prem-to-cloud transition
- Develop and maintain Terraform IaC so application teams can provision and manage cloud resources to platform standards
- Contributed to the SVN-to-GitHub migration, moving teams to GitHub workflows and supporting adoption of modern CI/CD and deployment practices
- Designed and built a FlexDeploy MCP server that lets ~150 users manage CI/CD pipelines, builds, and deployments directly from their IDE
- Built a custom VS Code extension that routes GitHub Copilot inference through Google Vertex AI / Model Garden, using enterprise GCP pricing while keeping the existing developer experience

Software Developer Intern

Jun 2025 - Jun 2026

- Owned The Hive's AI chatbot built on AWS Bedrock Agents, adding database querying, an Orders sub-agent, and organization-aware time zone conversion
- Built full-stack features with React, FastAPI, AWS, and Terraform to support the move to a cloud-native architecture
- Implemented secure authentication for the European Testing Hub by integrating Amazon Cognito with AWS-hosted services after the EU environments moved to the cloud
- Automated operations with an Inventory Reconciliation screen that eliminated manual Go-Live reporting and reduced developer support requests

IT Solution Success Intern

Jan 2025 - Jun 2025

- Created ~100 knowledge documents, led endpoint mapping to document backend service usage, and trained plant employees during on-site Go-Live support

The Boldt Company, Information Technology Intern | Appleton, WI

May 2024 - Nov 2024

- Wrote PowerShell scripts to update pay dates and pull data, and a Python script to automate CRM data deletion
- Resolved P3 and P4 HelpDesk tickets; built an IT budget in Excel and a Power BI dashboard for executives

ELL Advocates, IT Engineering Intern | Green Bay, WI

Nov 2023 - Apr 2024

- Automated lesson plans with Python, built web features on WordPress, and visualized program data with Tableau

Wisconsin Army National Guard, Combat Engineer | Medford, WI

Aug 2020 - Aug 2026

- Served as a noncommissioned officer, training and mentoring junior soldiers and holding them to Army standards
- Trained and supervised soldiers in building fixed and floating bridges and defensive positions, demolitions, and mine detection, with strict safety procedures

EDUCATION

University of Wisconsin-Whitewater - MBA, Information Technology Management

Sep 2026 - May 2028

University of Wisconsin-Green Bay - B.S. Computer Science, Software Engineering | GPA 3.75

Sep 2022 - May 2026

CERTIFICATIONS

AWS Certified AI Practitioner | ID d0ff2289cd3041c6bf30ecb7447ee2bc

Issued Aug 2026 | Expires Aug 2029

AWS Certified Cloud Practitioner | ID 297aae753aa8456794df49c1a7766cc5

Issued Aug 2026 | Expires Aug 2029

Google Cybersecurity Certificate | ID J5AQSRU4ARNQ

Issued Nov 2023
